Profession

Results-oriented Data Scientist with experience in data analysis, machine learning, statistical modeling, and business intelligence. Skilled in transforming raw data into actionable insights through predictive analytics, visualization, and automation. Proficient in Python, SQL, machine learning algorithms, and modern data science libraries. Passionate about solving real-world business problems using data-driven approaches and delivering scalable analytical solutions.

Education

Bachelor of Technology in Data Science

Echelon Institute Of Technology

2023-2027

- Relevant Coursework: Machine Learning, Data Mining, Statistics, Database Systems, Artificial Intelligence, Data Structures, Algorithms, Linear Algebra.
- Completed multiple academic projects involving predictive analytics and data visualization.

Projects

Business Projects

SwiftMarket

- Developed a data-driven business intelligence solution to analyze sales performance, conversion rates, and customer acquisition strategies.
- Evaluated market trends and product category revenue to optimize dynamic pricing strategies and cross-selling opportunities.
- Identified actionable insights on customer behavior to drive targeted marketing campaigns and improve overall business ROI.

E-Commerce Transactional Dataset Analysis

- Performed extensive exploratory data analysis (EDA) on a large-scale e-commerce transactional dataset to identify purchasing patterns and seasonal trends.
- Cleaned and structured raw multi-source sales data to analyze customer lifetime value (CLV), churn rate, and repeat purchase frequency.
- Formulated data-backed recommendations for inventory management and order fulfillment optimization.

Tools & Technical Projects

GTA Sales Analysis Dashboard — *Power BI*

- Built an interactive Power BI dashboard to evaluate multi-region global sales performance and commercial distribution across game editions.
- Visualized quarterly revenue growth, distribution channels, and country-wise demand metrics to enable data-backed business decisions.

FIFA Player Statistics & Transfer Analytics — *SQL*

- Executed complex SQL queries (Window Functions, CTEs, Joins, Aggregations) on the FIFA dataset to evaluate player attributes, performance metrics, and market values.

- Performed comparative analysis to identify high-value transfer targets and benchmark athlete performance against key statistical indicators.

Face Recognition Attendance System — *Python, Raspberry Pi*

- Developed an automated, real-time facial recognition attendance system combining computer vision algorithms with edge computing hardware.
- Integrated hardware-software components to streamline daily tracking, significantly reducing manual data entry errors and logging overhead.

Technical Skills

Programming	Python, SQL
Machine Learning	Scikit-learn, Regression, Classification, Clustering
Data Analysis	Pandas, NumPy, Statistics, Hypothesis Testing
Visualization	Matplotlib, Seaborn, Power BI, Tableau
Databases	MySQL
Version Control	Git, GitHub
Cloud	AWS (Basic), Jupyter Notebook
Soft Skills	Problem Solving, Critical Thinking, Communication, Team Collaboration, full Stack.

Certifications

- Python for Data Science - EIT
- SQL for Data Analytics - TGC Animation Multimedia
